| Exercise price or pricing formula                               | : | Price determined by Nomination and Remuneration Committee but no less than the face value of the shares.  |
| Maximum term of options granted                                 | : | 7 years from vesting date   |
| Source of shares (primary, secondary or combination)            | : | Primary   |
| Variation in terms of options                                   | : | During the year 2020-21, there was no variation in the Schemes.   |

ii) Method used to account for ESOS: Fair Value

iii) Where the company opts for expensing of the options using the intrinsic value of the options, the difference between the employee compensation cost so computed and the employee compensation cost that shall have been recognized if it had used the fair value of the options shall be disclosed. The impact of this difference on profits and on EPS of the company shall also be disclosed - Not applicable

iv) Option movement during the year 2020- 21

| <b>Particulars</b>   | <b>Details</b> |
|--|----------------|
| Number of options outstanding at the beginning of the period | 1,50,000       |
| Number of options granted during the year                    | Nil            |
| Number of options forfeited / lapsed during the year         | 50,000         |
| Number of options vested during the year                     | 25,000         |
| Number of options exercised during the year                  | 75,000         |
| Number of shares arising as a result of exercise of options  | 75,000         |

|   |        |
|---|--------|
| Money realized by exercise of options (INR), if scheme is implemented directly by the company | N.A.   |
| Loan repaid by the Trust during the year from exercise price received                         | N.A.   |
| Number of options outstanding at the end of the year  | 25,000 |
| Number of options exercisable at the end of the year  | NIL    |

v) Weighted-average exercise prices and weighted-average fair values of options shall be disclosed separately for options whose exercise price either equals or exceeds or is less than the market price of the stock – Weighted average exercise price ₹ 1 and weighted average fair value is ₹ 79.89 for outstanding options.

vi) Employee wise details (name of employee, designation, number of options granted during the year, exercise price) of options granted during the year 2020-21: NIL

No employee has received option amounting to 5% / 1% or more of options granted during F.Y. 2020-21

vii) A description of the method and significant assumptions used during the year to estimate the fair value of options including the following information:

a) Method of Valuation: To calculate the Fair value of Equity-settled share-based payment Black-Scholes-Merton formula has been used which is one of Option-Pricing Models as recommended under Indian Accounting Standard 102 (Ind AS 102).

b) Valuation Assumptions

- i. Strike Price: Strike price/ exercise price of share is rupee 1 per share.
- ii. Discount Rate: The rate used to discount employee benefit obligations reflects the estimated timing, amount of benefit payments and the currency in which the benefits are to be paid. The Discount Rate as tabulated below which relates to the benchmark rate available on Government Securities (G.Sec.) for the tenure of 1 to 4 years i.e. the expected term of the obligation. The rate is taken as per the deal rate as at 31-01-2018 as suggested under Indian Accounting Standard 102 (Ind AS 102), (Ref: www.fimmda.org)

| Years         | 1        | 2        | 3        | 4        |
|---------------|----------|----------|----------|----------|
| Discount Rate | 6.66.65% | 6.96.98% | 7.17.16% | 7.27.29% |

- iii. Expected Number of years to exercise shares: It is assumed that all shares will be exercised immediately after shares are vested for each tranche.
- iv. Standard Deviation (Expected Volatility): Volatility is calculated based on closing share price (BSE Data) as downloaded from yahoo finance website, as discussed with company. Volatility is derived from historical data of share price over last 7 years is calculated. Which comes as follows:

| Year | Annualised Standard Deviation | Average of last 7 years |
|------|-------------------------------|-------------------------|
| 2011 | 53%                           |                         |
| 2012 | 43%                           |                         |
| 2013 | 53%                           |                         |
| 2014 | 58%                           |                         |
| 2015 | 42%                           |                         |
| 2016 | 59%                           |                         |
| 2017 | 40%                           | 50%                     |

Based on above, expected volatility for fair valuation is considered based on average of previous 7 years is considered and mentioned in above table.

- v. Dividend Yield: Company has not declared any dividend for the last several years. The dividend yield assumption is taken as NIL.
- vi. Any Other input to model: Nil
- vii. whether and how any other features of the option grant were incorporated into the measurement of fair value, such as a market condition: NA

**Details related to GEBS**
